

Remarks

In the Specification:

Page 8 has been amended to correct an obvious error. The phrase "o is a number from 1 to 4" is inserted into line 19 and "o" is deleted at the beginning of line 20. All examples show metal complexes comprising L_1 , L_2 , L_3 and/or L_4 , while p or q cannot be simultaneously zero thus requiring that o is greater than 0 as a counter ion. Support is also found on page 17 lines 20-21 of the specification.
